

NOTES: 10 animals were assigned to each group.
Starting at Day 22, animals in various groups that had reached endpoint were removed from the study resulting in fluctuations in the growth curves at subsequent time points. Growth curves were no longer calculated when <70% remained in the group.
There was one animal in the 5X10[5] group and four animals in the 1X10[5] group that had no tumor growth post implant.
There was one animal in the 5X10[5] group that failed to maintain tumor growth starting on ~ Day 22.
